The great profit arising from the consolidation of these plants, which are equipped to grind and handle automatically over \$175,000 bushels of wheat daily, is in effecting economies in buying wheat, in manufacturing and selling the product, and in the command of low rall and ocean freight rates on the entire output, which at full capacity amounts to over \$400 CAR-LOADS PER DAY of incoming and outgoing freight.

The mills at Duluth, Superior, West Superior, and Milwaukee have a special advantage of low rates of freight by water to all the inland lake cities, Buffalo, and the East, and the mills of New York City have special facilities for supplying the local, the seaboard, and the export trade with their entire output.
